

MDS Medical AC-DC Adapter

19 Volt, 90 Watt / MDS-090AAS19 F/B

090AAS19 F/B

Highlights & Features

- Meet DOE Level VI and ErP Lot 7
- Safety Approvals to IEC 60601-1 3.1rd ed. & IEC 62368-1
- Compliant with IEC 60601-1-2 4th Ed. Requirements
- Low touch current (<0.1 mA Normal & ,0.3 mA single fault)
- Over-Voltage/Load/Temperature & Short Circuit protections
- 1 Million Hours MTBF
- 2 × MOPP isolation
- 3 years warranty

Safety Standards

CB Certified for worldwide use

Model Number: MDS-090AAS19 F/B
Unit Weight: 450 grams (16.2 ounces)
Dimensions (L x W x H): 150.0 x 60.0 x 35.0 mm
 5.9 x 2.4 x 1.4 in

General Description

The MDS series of external power supply come with universal AC input at 90 Vac to 264 Vac. Other features include low touch current, risk management report available and the electric shock protection comply with 2 × MOPP. The MDS series is certified for EMC standards according to EN/BS EN 55011 for industrial, scientific and medical (ISM) radio-frequency equipment and EN/BS EN 55032 for Information Technology Equipment (ITE) radio-frequency equipment. In addition, only recognized Japanese capacitors are used.

The MDS series come with both medical and ITE safety approvals including UL/cUL/CCC/CE and CB certification and are fully compliant with RoHS Directive for environmental protection..

Model Information

Medical AC-DC Adapter

Model Number	Input Voltage Range	Output Voltage	Output Current
MDS-090AAS19 FA	90-264 Vac	19 Vdc	4.73 A
MDS-090AAS19 FE			
MDS-090AAS19 BA			
MDS-090AAS19 BE

Specifications

Input Ratings / Characteristics

Nominal Input Voltage	100-240 Vac
Input Voltage Range	90-264 Vac
Nominal Input Frequency	50-60 Hz
Input Frequency Range	47-63 Hz
Input Current (max.)	2 A @ 115 Vac, 1 A @ 230 Vac
Efficiency (typ.)	91.7%, Reference Fig.1
Average Efficiency (min)	88% @ 115Vac
Standby Power (max.)	0.21 W @ 115 Vac
Inrush Current (typ.)	50 A @ 115 Vac, 100 A @ 230V ac
Touch Current (max.)	0.1 mA @ 264 Vac NC ¹⁾ , 0.3 mA @ 264 Vac SFC ²⁾
Earth Leakage Current (max.)	0.1 mA @ 264 Vac NC ¹⁾ , 0.3 mA @ 264 Vac SFC ²⁾

1) NC: normal condition

2) SFC: single fault condition

Fig.1 Efficiency versus output load

Output Ratings / Characteristics

Nominal Output Voltage	19 Vdc
Total Regulation	± 5%
Output Current	4.73 A
Output Power	90 W
Line Regulation (max)	± 0.5%
Load Regulation (max)	± 4.5%
Ripple & Noise (typ.)	91.2 mV pk-pk @ Full load, Reference Fig. 2,
Start-up Time (max)	3000 ms
Hold-up Time (min)	20 ms @ 115 Vac&230 Vac
Dynamic Response (Overshoot & Undershoot O/P Voltage)	± 5% @ 50-100% load

Mechanical

Case Chassis	PC
Case Cover	PC
Dimensions (L x W x H)	150.0 x 60.0 x 35.0 mm (2.4 x 5.9 x 1.4 in)
Unit Weight	450 grams (16.2 ounces)
Indicator	NA
Cooling System	NA
Terminal	Input C14 socket
	Output 4 pin Din / Tuning fork type

Environment

Surrounding Air Temperature	Operating	0°C to +40°C
	Storage	-40°C to +85°C
Operating Humidity		10-95% RH (Non-Condensing)
Operating Altitude		3,000 meters (9842.52 feet)
Shock Test (Non-Operating)		50 G, 11 ms, 3 shocks for each direction
Vibration (Non-Operating)		5-500 Hz, 2.09 Grms, 20 minute for each three axis

MDS Medical AC-DC Adapter

19 Volt, 90 Watt / MDS-090AAS19 F/B

Protections

Overvoltage (max.)	150%, Latch Mode
Over load / Over current (max.)	130% of rated load current, Hiccup Mode, (Non-Latching, Auto-Recovery)
Over Temperature	Hiccup Mode, (Non-Latching, Auto-Recovery)
Short Circuit	Hiccup Mode, (Non-Latching, Auto-Recovery)
Protection Against Shock	Class I for F series
	Class II with functional earth for B series

Reliability Data

MTBF (typ.)	1 Million based on Telecordia SR-332

MDS Medical AC-DC Adapter

19 Volt, 90 Watt / MDS-090AAS19 F/B

Functions

Start-up Time

The time required for the output voltage (V_o) to reach 90% of its set value, after the input AC voltage is applied.

Rise Time

The time required for the output voltage (V_o) to change from 10% to 90% of its steady state value.

Hold-up Time

Hold up time is the time when the AC input collapses and output voltage retains regulation for a certain period of time. The time required for the output to reach 95% of its set value, after the input voltage is removed.

■ Graph illustrating the Start-up Time, Rise Time, and Hold-up Time

MDS Medical AC-DC Adapter

19 Volt, 90 Watt / MDS-090AAS19 F/B

Dynamic Response

The power supply output voltage will remain within $\pm 5\%$ of its steady state value, when subjected to a dynamic load change from 50 to 100% of its rated current.

Inrush Current

Inrush current is the input current that occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.

Overvoltage Protection

The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 4 under "Protections". Power supply will latch off, and require removal/re-application of input AC voltage in order to restart.

Short Circuit Protection

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

Overload & Over current Protections

The power supply's Overload (OLP) and Over current (OCP) Protections will be activated when output current is between 110% and 130% of I_o (Max load). Upon such an occurrence, V_o will start to drop. Once the power supply has reached its maximum power limit, the protection will be activated, and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition causing the OLP and OCP is removed and I_o is back within the specified limit.

Additionally, if the I_o is $<130\%$ but $>110\%$ for a prolonged period of time (depending on the load), the Over Temperature Protection (OTP) will be activated due to high temperature on critical components. The power supply will then go into hiccup mode until the fault is removed; and, the input voltage is removed, then reapplied.

Over Temperature Protection

As mentioned above, the power supply also has Over Temperature Protection (OTP). This is activated when the overload condition persists for an extended duration and the output current is below the overload trigger point but $>100\%$ load. In the event of a higher operating condition at 100% load, the power supply will run into OTP when the surrounding air temperature is higher than the operating temperature. When activated, the output voltage will go into hiccup mode until the input voltage is removed; then, reapplied, and the surrounding air temperature drops to its normal operating temperature.

MDS Medical AC-DC Adapter

19 Volt, 90 Watt / MDS-090AAS19 F/B

Certificate

Delta has been certified as meeting the requirement of ISO 13485: 2003 and EN ISO 13485:2012 for the design and manufacture of switching power supply and adaptor for medical device.

In addition to a UL Total Certification Program (TCP) approved client laboratory for IEC 62368-1. Delta also has participated UL Client Test Data Program (CDTP) for IEC 60601

Meet DOE Level VI and ErP Lot 7 Efficiency Requirement

Attention

Delta provides all information in the datasheets on an "AS IS" basis and does not offer any kind of warranty through the information for using the product. In the event of any discrepancy between the information in the catalog and datasheets, the datasheets shall prevail (please refer to www.DeltaPSU.com for the latest datasheets information). Delta shall have no liability of indemnification for any claim or action arising from any error for the provided information in the datasheets. Customer shall take its responsibility for evaluation of using the product before placing an order with Delta.

Delta reserves the right to make changes to the information described in the datasheets without notice.
