

Barcelona, August 4<sup>th</sup>, 2023

Dear Valued Partner,

We greatly appreciate your partnership with Ignion and the trust you have placed in our products and services. Following our communication in Q4 of 2022 about our product portfolio, we are writing to inform you about an important update regarding the product NN01-XXX.

After a comprehensive analysis of the product's performance, market feedback, and advancements in technology, we have made the decision to begin an **End Of Life Process (EOL) for the NN01-XXX family of parts, and not to recommend the integration of NN01-XXX into new designs**. Our goal is to continually enhance our offerings to meet the evolving requirements and highest industry standards.

Therefore, we would like to inform you that, effective immediately for the NN01-XXX family of parts, we will begin an EOL process with the following stipulations and milestones:

- Any NN01-XXX parts currently in your Stock or on order with Ignion until **September 1<sup>st</sup>, 2023** will be fully returnable & eligible for stock rotation **from January 1<sup>st</sup> until March 31<sup>st</sup>, 2025**.
- Any new orders after September 1<sup>st</sup>, 2023 for NN01-XXX parts will be **non-cancellable/non-returnable**.
- New orders will be accepted for the balance of 2023. **A single order/production run will be allowed in January 2024, in July 2024, and in January 2025**. We strongly recommend that you work with Ignion Sales and your customers to arrange for appropriate EOL inventory coverage for our joint customers.

We understand the importance of fulfilling our commitments and supporting ongoing projects. Therefore, we will accept orders for these projects until 2025 as noted above, ensuring a smooth transition and uninterrupted supply for your existing projects. We will need to jointly plan, however, to ensure there is adequate coverage for end customer forecasts and not an oversupply of additional inventory.

Furthermore, we would like to inform you that **there will be a price adjustment for the NN01-XXX product**, effective January 1<sup>st</sup> 2024 (See below Price List). This decision has been made to ensure that we can maintain the highest level of quality, invest in research and development, and provide you with the most reliable and innovative solutions in the industry.

During this transition, our dedicated sales team is available to assist you. We will be more than happy to provide detailed information on alternative products or solutions that can seamlessly replace the NN01-XXX in new designs, ensuring compatibility and optimal performance by NN02 and NN03 products.

Thank you for your support of IGNION products. If you have any questions or concerns, please feel free to contact your IGNION representative or reach us at [logistics@ignion.io](mailto:logistics@ignion.io).
