

Cree, Inc. Process Change Notification PCN-PW046
Conversion from Imperial to Metric fasteners for CAS100H12AM1 Module
Effective April 15th 2013

Change

Effective starting April 15th 2013 all Cree CAS100H12AM1 modules with serial numbers 894 and higher will convert from imperial to metric nuts:

- The large power terminals will now have M5 x 0.8 hexagonal nuts
- The small gate terminals will now have M2 x 0.4 square nuts
- The Rev. A datasheet currently published on our website reflects this change
- The reason for the change is due to customer requests for metric nut sizes

Product Description

Affected part number is: CAS100H12AM1 1.2kV, 100A Silicon Carbide 50mm Half-Bridge module.

Impact of Change

No change in product function.

Effective Implementation Date

Implementation is by Cree Manufacturing after the effective date of this PCN. Product with this change may be delivered to your receiving locations on or after CW16 2013.
