Product Change Notification Form

PCN Number: 20121003-01	**Rev:** B	**Date:** 10/03/2012

Summary of Change: USB-MPC-KIT is being discontinued

Reason for Change: FDI has decided to discontinue the USB-MPC-KIT.

Detailed Description of Change:

The USB-MPC-KIT is being discontinued. After available stock at distributors is depleted, it will not be refilled. This is a legacy product and it has become difficult to update or maintain PC software driver compatibility with new versions of Windows. A total redesign of the product is possible, but this new version would not be backward compatible with our existing USB-MPC unit and most of our existing customers require this compatibility for support in their legacy test systems. It might also be possible, based on customer demand, for us to produce another batch of the existing Rev B units, but these will not support any of the current versions of Microsoft Windows. However this still might be acceptable for existing USB-MPC customers who have already worked around the PC software driver issues in their product configurations.

Please contact FDI if you are interested in a Last Time Buy Purchase Order for the USB-MPC-KIT, but realize that this order will be NCNR and will be subject to MOQ's.

Products Affected:

Effected Product	USB-MPC-KIT

Forecasted Key Dates and Milestones:

10/03/2012 PCN Date, the date this document was released for distribution to customers and distributors.

10/31/2012 Last Time Buy Order Date, the last date that FDI will receive new orders for Effected Products. FDI will continue to deliver Effected Products until all of our existing inventory is depleted but beyond the LTB Date we cannot guarantee availability of any additional product.
