

Product Change Notification

TE Connectivity

Product Change Notification: P-21-021469

PCN Date: 21-SEP-21

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Spec 44 Wire, Electric, Radiation-Crosslinked (Blue)

Description of Changes

TE Connectivity Wire and Cable is changing its sourcing of a blue color concentrate used to manufacture certain blue 44A and Mil-Spec wire products. With the source change, the blue color concentrate will be subject to a formulation change, more specifically the blue pigment. The new blue color concentrate formulation will not contain the Phthalocyanine Blue BN pigment used in the previous blue color concentrate. The reason for the change is to ensure the blue wire product is compliant in meeting the requirements sold to TE Connectivity Specification 44 and SAE AS 81044 specification. The change in the color concentrate will result in a slight shift in the final blue color but is still within the Munsell color limit and requirements of MIL-STD-104, Class 1.

Reason for Changes:

Product improvement.

Estimated Dates:

Last Order Date (Obsolete Parts Only):

First Date To Ship (Changed Parts Only):

Last Ship Date (Obsolete Parts Only):

Last Date for Mixed Shipments: (Changed Parts Only):

No Mixed Shipments
