From: Littelfuse Product Management – Industrial Business Unit

Subject: LFPCN_PG0162 - Change in labelling process for L25S series products.

Document Number: LFPCN_PG0162

Date: 19th May 2023

Dear Valued customer:

With regards to the above reference, Littelfuse would like to inform you that we have implemented a change in labelling process for L25S series products 35A to 60A (Part Numbers per below table). We are upgrading from labelling via ink print on body process to applying paper label on body. Paper labelling is already implemented in most of our products including L25S 0-30A range. This process change offers improved labelling / marking quality and improves productivity.

There is no change to fit, form or function of the actual product.

Date of implementation: 21st April 2023

| Part Numbers affected | Old label | New label |
|---|---|---|
| L25S035.T L25S040.T L25S045.T L25S050.T L25S060.T |  |  |

If you have any questions, or need additional information please contact your Littelfuse representative.

Thank you for your continued business.

Sincerely,

Prashant Kulkarni
