

LAN9360C-I replacing LAN9360A-I

Dear Sir or Madam,

LAN9360A parts are now phasing out, replaced by LAN9360C parts. LAN9360A and LAN9360C parts are pin-to-pin compatible with each other's. They share the same AC and DC characteristics as well as the same features set.

Part numbers phasing out	Replacement part numbers
LAN9360A-I/CQB-100	LAN9360C-I/CQB-101
LAN9360A-I/CQBT-100	LAN9360C-I/CQBT-101

There will be no last time buy for LAN9360A parts because LAN9360C parts can be used in place of LAN9360A without redesigning existing products. We expect several customers to buy the remaining inventory of LAN9360A parts over the next few weeks to support their prototyping activities.

LAN9360C parts are already in PL-10 and orders can be taken. LAN9360 AVB Audio Endpoint parts are getting more and more popular for audio applications over Ethernet. Microchip is just kicking off a marketing campaign for that part. We would like to kindly ask you to build inventory for the new LAN9360C parts to support market demand.

Best regards,

Francis IELSCH
