Description and purpose of change:

Because of a database mismatch, Würth Elektronik will change the body plating description on the datasheet.
 This is a datasheet correction only. There will be no change in form, fit, function, quality or reliability of the product.

Detail of Change:

Connector body plating description before PCN: Gold, min. 0,076 µm over Nickel
 Correct body plating description after PCN: Nickel, min. 2,54 µm over Copper

Reliability / Qualification Summary:

There will be no change of the product, therefore no additional reliability or qualification testing will be performed.
