From: Littelfuse Product Management – Industrial Business Unit

Subject: Obsolescence of EV1K series products

Document Number: LFPCN_PG0168

Date: 2nd Aug 2023

This letter is to inform Littelfuse Sales, Sales Support & Customers of our decision to obsolete EV1K Series (Gen-1) product offering due to various reasons; also to offer New 25EV1K Series (Gen-2) product as alternate product to consider for existing and new design-in activities.

EV1K Series fuses are high-voltage (1000Vdc) auto-grade fuses released a year ago to stay engaged with Automotive customers during their early design stages. These EV1K Series with extension ZXBD are referred to as Path A / Gen-1 version products.

[EV1K Series \(Path A/Gen-1\) Datasheet](#)

This EV1K Series was built in a low volume manufacturing line with limited ability to expand and automate. Recently we were facing manufacturing challenges with the EV1K Path A Series and due to which our deliveries for EV1K Series are significantly delayed. Currently we are prioritizing existing customer orders that are expedited. Once the existing orders are completed, we will be discontinuing/Obsoleting this product.

25EV1K Series, Path B / Gen-2 version of high-voltage (1000Vdc) auto-grade fuses, will be replacing the EV1K Series. These products have improved design and manufacturability. We can support customers with low volume samples for the 25EV1K Series NOW. Please refer Annex A for 25EV1K Series ordering part numbers for EV1K parts.

[25EV1K Series \(Path B/Gen-2\) Datasheet](#)

Our recommendation is to move customers to the 25EV1K Series Path B/Gen-2 version products as soon as possible.

For any technical or cross reference questions, please contact our Technical Support team at (800) TEC-FUSE. Please update your ordering systems accordingly and thank you for your business.
