IMPORTANT NOTIFICATION

Industrial Adhesives & Tapes Division 3M™ Sprayable Adhesives Product Discontinuations

Dear Valued 3M Distributor:

Due to unexpected raw material obsolescence and limited alternate RMs from our suppliers, 3M has made the decision to discontinue our 3M™ Pressure Sensitive Adhesive 4224NF and 3M™ 5-Way Penetrant.

Effective immediately, 3M will no longer be able to manufacture these two product families. We do have a limited amount of 3M™ Pressure Sensitive Adhesive 4224NF material on hand in 5-gallon pails, however, once this stock is depleted the SKUs will be discontinued. Any open orders for these products that do not have inventory on hand will be deleted.

To assist you with this transition, below is a list of potential alternative products that you could evaluate and determine whether it may be suitable for your application.

Product Discontinuation / Changes				Potential Alternatives
