Reason for Change:

A new better looking, free viewing angle (IPS), high brightness display is offered on the GTT43A series.

Schedule of Change:

February 24, 2023

Product Change:

The overall dimension of the new IPS display is the same as the current TN display. The only noticeable difference is the power required to run the backlight of new IPS displays; it runs at 15mW more than the current display.

Firmware is the same latest version released for the GTT43A displays; no other functionality changes.
