

Product Change Notification

TE Connectivity

Product Change Notification: PCN-23-190952

PCN Date: 27-OCT-23

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

J series

Description of Changes

Discontinue the J-series. The J-series is an older generation of the P-series. We recommend customers to change to the P-Series. For legacy products we have launched a J-Series extender so the P series PNs fit in the same panel cutout. The substitute PNs below already include the extenders. In addition the extender can be ordered separately under PN PA400.

Reason for Changes:

As part of strategic alignment and portfolio optimization, TE has decided to discontinue the TCPN's included in the list below. Last time buy and last time shipments will be supported until the provided dates below. Please refer to the provided alternative/replacement PNs highlighted (if listed) with the intention to support the continuity of our customer's design needs. Please review any replacement parts as they may not be form/fit/function equivalents.
