TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description

Multiple products in the Miniature SMD Pressure Product Line (MS58xx and MS5540)

Description of Changes

Internal Process Change : the ceramic substrate will be cut by machine (Dicing machine) instead of manual snapping according to precut line

Reason for Changes

Minimize manual handling and risk to contaminate /touch protective gel

Estimated Dates:

Last Order Date (Obsolete parts)

No impact on order. Running change is planned for Oct-23

Last Ship Date (Obsolete parts)

Part Number(s) being Modified:

Part Number	Material description	Part Number	Material description
10203100-00	MS5540-01BA W GEL P-CAPS T&R	MS580302BA01-00	MS5803-02BA 2BAR W GEL P-CAPS

Subject: Product Change Notice – Ceramic Dicing Process Change

Dear Valued Customer,

This notification is to inform you that the TE Connectivity Sensors business has been working on updating the ceramic substrate cutting process for our SMD pressure product line from a manual operation to an automated process. The new process will be using a dicing machine instead of a manual snapping process. This change will improve our capability and minimize risk of contamination due to manual handling.

This list of part numbers affected is included in the attach. This change is being implemented now and no action is required on your part.

The TE Connectivity Sensors team thanks you for your continued business and looks forward to supporting your future Sensors requirements.

Regards,
Joseph Coakley
Product Management Director
TE Connectivity Sensors
