**Subject:** Design change to Renesas product ISL8117\*

**Publication Date:** 12/18/2023

**Effective Date:** 3/18/2024

### Revision Description:

Initial Release

### Description of Change:

This notice is to inform you that Renesas Electronics America has made a design change to the following products;

ISL8117A-LDEMO2Z	ISL8117AEVAL2Z	ISL8117DEMO3Z	ISL8117FRZ-T
ISL8117ADEMO1Z	ISL8117AFRZ	ISL8117DEMO4Z	ISL8117FVEZ
ISL8117ADEMO3Z	ISL8117AFRZ-T	ISL8117EVAL1Z	ISL8117FVEZ-T
ISL8117ADEMO4Z	ISL8117DEMO1Z	ISL8117EVAL2Z	
ISL8117AEVAL1Z	ISL8117DEMO2Z	ISL8117FRZ	

### Reason for Change:

This is a 3 mask layer change to address a floating node design error which could damage the device if the EN pin is held low in disabled state. When power is supplied to VIN and the EN pin is low, a leakage path can occur which may cause the floating node to rise to an unsafe level. This has been addressed by pulling this node to GND when the EN pin is low . The change has no impact to any other functionality.

### Impact on fit, form, function, quality & reliability:

The change will have no other impact on the form, fit, function, quality, safety, reliability, and environmental compliance of the devices.

### Product Identification:

Product affected by this change is identifiable via Renesas Electronics America internal traceability system. Product affected by design change will be identifiable by date-code.
