Changes for AT4103 & AT4104 Knobs for FR01, MR & MRB Series Rotaries

- ☐ Engineering ☐ Part Number
☒ Product ☐ Appearance

Change to Material of Spring in Rotary Knobs

There will be a revision to the material used for the spring in the AT4103 small knob and AT4104 large knob. These color tipped knobs are used with the FR01, MR and MRB Series Rotaries. The change to the material of the spring inside the knobs, which was previously carbon steel and will be revised to stainless steel, will apply to all standard and custom knobs. There will be no difference in the effectiveness of the knobs' function, and no dimensions are altered. Effected standard part numbers for the knobs are listed on the table below, and part numbers for the assembled knob and switch follow on pages 2 and 3.

Series	Spring Before Change	Spring After Change
FR01 Rotaries with Metal Shaft MRA, MRAN & MRK Process Sealed Rotaries MRX, MRY & MRT Power Level Rotaries MRB PCB Process Sealed Rotaries	Carbon Steel	Stainless Steel

Notes

There are no changes to the knobs' dimensions or specifications.
 Contact the factory if more details are needed.
