

Product change notification (PCN)

Title / short description	Modification to the flange of the M17 and M23 device connectors, angled, rotatable, M17-M23 PRO series
Affected article category	Connector
Change category	Form and appearance
Change number	NAB140058-0
Reason for PCN/PDN Revision	

Purpose/objective of the change

The flanges of the M17 and M23 PRO device connectors, angled, rotatable, are being adapted. The sealing groove on both flange sizes as well as the outer geometry of the 28 x 28 mm flange are being adapted due to increasing demands on process and delivery capability.

Detailed description of the change

In both device connector versions, the sealing groove on the underside (toward the application housing) is being adapted and the black O-ring is being replaced by a green molded seal. This increases both the process reliability during production and the transport safety of the base seal. Furthermore, a contour change is being carried out on the outside of the 28 x 28 mm flange, which increases process reliability during assembly. Consequently, both changes take into account the continuous improvement process as well as the high quality standards of Phoenix Contact.

Identifying characteristics

Sealing contour on the underside of the flange, outer geometry of base

Start of Production (SOP)	2024-03-01	Last Time Delivery (LTD)	2024-02-29
Effective date (EOP)	2024-03-01	End of Service (EOSR)	-
End of Sales (EOS)	2024-01-31		

Short-term change (< 6 months) or discontinuation (< 12 months), due to:
