

End of Life Notification

Date: August 31, 2023

Part Number(s): WSU060-3000 and WSU060-3000-R, WSU060-3000-13 and WSU060-3000-R13

To Whom It May Concern:

Effective immediately, WSU060-3000, WSU060-3000-R, WSU060-3000-13 and WSU060-3000-R13 will no longer be manufactured. These parts were designed to conform to UL 60950-1 standard which has been superseded by UL 62368-1. To comply with UL62368-1, the design of the power supplies was modified and in the process the output current had to be limited to 2.5A. The part numbers rated for 2.5A will be WSU060-2500, WSU060-2500-R, WSU060-2500-13 and WSU060-2500-R13. If 2.5A rating is not sufficient for the application, Triad has designed a 3.5A rated power supply that can also be used as replacement to WSU060-3500, WSU060-3500-R, WSU060-3500-13 and WSU060-3500-R13. The part numbers for the 3.5A rated power supplies are WSU060-3500, WSU060-3500-R, WSU060-3500-13 and WSU060-3500-R13.

Existing products will continue to be available until inventory is depleted.

Sincerely,

Lazaro Rodriguez

Engineering Manager
