Title / short description	Addition of a test pick-off to FKDSO 2,5 and 1,5
Affected article category	Electronic housing
Change category	Form and appearance
Change number	CAC230058-00
Reason for PCN/PDN Revision	

Purpose/objective of the change

Enabling of a test pick-off for the PCB terminal blocks

Detailed description of the change

We always strive to provide you with state-of-the-art products for your application. As part of our continuous improvement process, we will therefore revise our FKDSO product family. Currently, the FKDSO 2,5 PCB terminal block has a test pick-off located below the actuating push button. It is therefore difficult to access. With this change, another test pick-off is now being implemented, which is much easier to access.
