- ♦ Will provide **years of service**.
- ♦ **Adds Value** to your business operations.

For many years the “original” PAKSTER™ plastic egg flat, also known as the “Phillips Flat”, has offered a solution to the challenge of protecting fragile eggs while transporting. Its unique flexible cell wall design cushions eggs during handling for fewer checks. Safe handling results in reduced product damage and improves the economic performance. East Iowa Plastics’ PAKSTER™ egg flats will add value to your business operations. In the commercial egg business where the difference in profit and loss can be measured in the fractions of a penny, managers know the importance of protecting eggs at every level of production. When egg damage increases, egg profits decrease. Our customers prefer PAKSTER™ Egg Flats because they believe PAKSTER™ flats provide the best protection of any flat available today.
