Audience	All Digi Embedded Partners and Customers
Description of Change	Obsolete 20-101-1051 (RCM3365) and 20-101-1196 (RCM3900).
Reason for Change	<p>Obsoleted products make use of a 32MB NAND flash component that was discontinued over six years ago. Digi can only source limited quantities of this component on the secondary market.</p> <p>Due to increased component cost, MSRP for LTB units has changed.</p>
Replacement Products	<p>20-101-1197 (RCM3910) is identical to a 20-101-1196 (RCM3900) without the 32MB NAND flash. Customers can use media in its microSD socket for storage needs previously met by the 32MB NAND flash.</p> <p>20-101-1068 (RCM3315) is similar to 20-101-1051 (RCM3365) but uses a 4MB serial flash instead of the 32MB NAND flash. Customers using the NAND for a limited FAT filesystem can migrate their program with minimal source code changes.</p> <p>Consider either as a replacement for both discontinued products.</p> <p>Customers will need to recompile their source code for the new target.</p>
