

Greetings from CAIG Labs,

We are writing to inform you that the DeoxIT® FADER S-Series, F100 Spray (F100S-L2) has been officially discontinued.

We are pleased to introduce the recommended replacement for the discontinued product: DeoxIT® Fader in the form of F100 Liquid. The F100 Liquid is available in two convenient options – oilers (F100L-L25C) and squeeze tubes (F100L-L2C). Both alternatives offer the same trusted quality and performance that you have come to expect from CAIG Labs.

Rest assured, the F100 Liquid retains the exceptional qualities that made the F100 Spray so valuable to you. It provides the same great cleaning and lubrication properties that have made DeoxIT® Fader a preferred choice for maintaining conductive plastic and carbon based controls.

To view and order the replacement products, please visit the following links:
