Subject: Delta Electronics Americas VFD-E Series End-of-Life

Dear Valued Customer,

This notification is to inform Delta Electronics Americas customers of our End-of-Life for the VFD-E Series Variable Frequency Drive. The VFD-E drive has been in production since 2007 and has been an excellent product for the past 16years.

In 2017 we released the VFD-MS and in 2019 we began the phase out of the VFD-E drive. The VFD-E series phase out period is now complete and we have moved to the VFD-MS series.

The VFD-MS product offers more function, capability and power range compared to the VFD-E. The VFD-MS and its accessories are available globally and should you have any questions about the VFD-MS, please contact our technical support team at techsupport.ia@deltaww.com.

Sincerely,

Delta Electronics Americas, Ltd
Industrial Automation Business Unit

Attached: EOL VFD-E Series and Accessories Part Number List

Material	Notes	Replacement
CME-COP01	End Of Life	no replacement, VFD-MS manual has accessories listed
