

Guntersville Assembly Manufacturing (GAM)

Product Change Notification

PCN Number: GAM-PCN-005

Notification Date: 7/26/2023

Title: ZR Series Insulation Displacement Connector Color Change	
Existing Product Identification:	New Product Identification:
##ZR-8M-P (## = Number of circuits / positions: 02 ~ 13) Wafer Material Color: GREEN AWG: 28	##ZR-8K-P (## = Number of circuits / positions: 02 ~ 13) Wafer Material Color: BLACK AWG: 28
Reason for Change: The raw material resin manufacture has informed JST they will discontinue select colors of PA66 material as UL certified due to inappropriate measures in UL certification of their resin materials. The subject product in the green colored resin is affected by this announcement and, therefore, will only be supplied as non-UL certified products.	
Change Description: As a result of this announcement, to maintain the UL certification, JST will offer the ZR IDC connector in BLACK (i.e. 02ZR-8K-P). Other than the color, there will be no difference in the form, fit, or function performance of the product.	
Example Label of UL Certified Product:	
	
BOM Management of Related Assemblies: We have been assured existing inventory in our GAM warehouse of the current GREEN connectors will retain UL certification. All existing inventory will be used in applicable cable / harness assemblies until the inventory is depleted. Then the switch to the UL certified BLACK connector will commence. The GREEN connector will only be used to complete an entire customer order. We will not mix GREEN and BLACK to complete an order. In our production planning stages, if we find that we do not have enough of the GREEN version, we will use the BLACK version. There will be no changes to the quoted costs or assembly part numbers.
