RE: 3M™ Pleated Foil Shielded Cable 90202 Series

To Whom it may concern

3M Laboratory has learned the 90202 Jacketed Pleated Foil Flat Cable more appropriately fits under UL Style 20674. We are in the process of updating our related paperwork to remove the old UL Style 20297. There is no change to the cable form, fit, function, or performance. We anticipate this paperwork being fully completed with updated label by the time of next shipments.

Please let us know if there are any questions or concerns on this subject.

Thank you
