## Product Change Notification

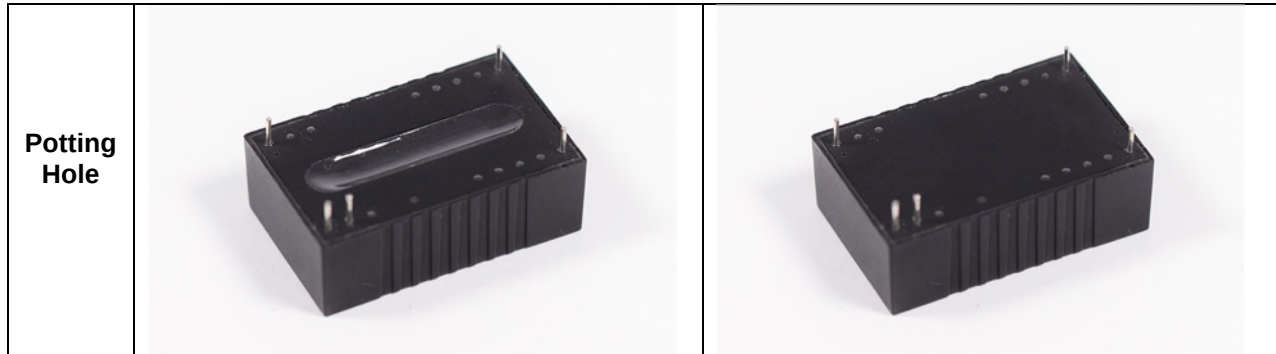

### Title: PCN #2024004 TDK-Lambda Americas Inc. PXC-M case tooling change

The case tooling for the PXC-M03, PXC-M06 and PXC-M10 series of DC-DC converters is being replaced to improve the manufacturing process. The slot previously used during the potting process is being removed, increasing the case height by 0.3mm. There are no changes to the overall product price or function. Safety certifications are not impacted.

| Change                | Before                                                                                                  | After                                                                                                    |
