

Weidmüller Circuit Breaker Products – Part Number Discontinuation

DS&P, April 2024

Part Number Discontinuation Notice

Dear Valued Customer,

Weidmüller would like to inform you of a product discontinuation involving a line of circuit breakers. This transition will be handled as an immediate change and parts in the HB series product line will be discontinued for sale. The current QL & QY series lines will be the replacement for the HB series in the product portfolio. The reason for this product discontinuation is Weidmüller is streamlining its circuit breaker portfolio by reducing redundancies and focusing on specific product offerings.

Please find the full list of discontinued parts and their replacements in the attached sheet.

Due to some customers still using antiquated part numbers for the HB line those were included in the part cross list.

Example:

HB old Material Number	HB new Material no.	HB Part Description	Pole	Trip Curve	QL Description (AC)	QL P/N (AC)	QY Description (DC)	QY P/N (DC)
HB1205UC	2822050000	HB1205UC HYD.MCB UL489 1P, Curve2,5 .0A	1	Medium	QL-1-13- DM-KM-5.0	7940102575	QY-1-13-DM- U2-5.0	7940102628
HB1206UC	2822060000	HB1206UC HYD.MCB UL489 1P, Curve2,6 .0A	1	Medium	QL-1-13- DM-KM-6.0	7940102576	QY-1-13-DM- U2-6.0	7940102629

****Note: The HB series was a universal voltage product (AC/DC). The replacement series products are not universal voltage. Therefore, the QL series will be the AC voltage replacement, and the QY series will be the DC voltage replacement.****

If you have any questions, please contact your respective Weidmüller sales representative or Weidmüller's technical support department at 800/849-9343.
