Description and Purpose:

This change significantly improves the resistance to galvanic corrosion.

Changed Item	Before Change Description	After Change Description
Hardware	The sensor was susceptible to galvanic corrosion in certain environments, particularly those where the sensor is mounted on or near a steel structure with high levels of water or humidity.	The sensor is able to resist this type of corrosion much more effectively. There are no visual differences.

Reason / Motivation for Change:	Improve corrosion resistance
Anticipated impact on fit, form, function, reliability, product safety, electrical characteristics, or manufacturability:	Sensor will be more reliable in some environments
