**OUR NEW LED
WITH BUILT-IN
UV & FAR-RED**

**PUSHING
PAST PAR**

WELCOME

Welcome to ILUMINAR Lighting, where we bring the latest technologies to greenhouse and indoor lighting. We have a wide selection of cutting edge fixtures as well as mature technology platforms that perform predictably and with excellent reliability.

We provide expert lighting solutions for professional gardens.

We care about what experienced growers care about: converting as much power from the socket into a pure, full spectrum for your plants, as efficiently as possible.

ILUMINAR Lighting continues to work alongside commercial horticulturists to break new ground in the lighting industry. Our history of innovation and support keeps you ahead of the curve on indoor/outdoor lighting techniques and technologies.

ILUMINAR Lighting provides a full line of complete solutions for every application.

**ILLUMINATING THE FUTURE
OF INDOOR GROWING**

ILUMINARLIGHTING.COM

LED LIGHTING SOLUTIONS

Years of research has led ILUMINAR Lighting to discover the type of LED spectrums that will perform within our agricultural sector. The ILUMINAR Full Spectrum Grow LED is capable of growing plants from seed to harvest, in various applications, by replicating the full body of light required to create chlorophyll a and chlorophyll b, essential in developing all plants.

LED lighting has evolved, and ILUMINAR continues to change as the industry develops. We provide the best spectrum available and best possible efficacy available on the market. ILUMINAR Lighting is pushing the science and purpose of LED lighting and delivering superior results in the commercial and hobby markets.

LED SPECIFICATIONS

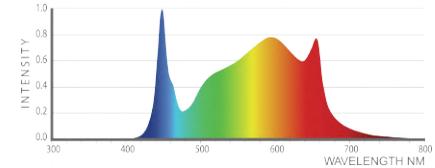

Emitter Cooling	Passive / Extruded Case
Dimming / Controllable	0-10V Controllable
Light Distribution +/- 5%	125°
LED Lifespan (90% of Life)	55,000+ hours
Min Power Factor	0.9 / 0.95

iLogic Full Spectrum

Enjoy all the benefits of full spectrum lighting without sacrificing efficacy. The iLogic Full Spectrum LED delivers deep, penetrating light intensity along with industry-leading uniformity. Optimized for the most demanding floriculture applications, the iLogic Full Spectrum is designed to scale up with ease as your operation grows, offering unbeatable reliability, longevity, and performance.

iLogic UV + Far-Red

Increase Yield and Enhance Trichome Production with UV & Far-Red Spectrum

The iLogic + UV Far-Red fills the spectral gap that has persisted between legacy lighting technologies and LED. Plants grown under full spectrum light supplemented with ultraviolet and far-red have a marked increase in growth rates combined with increased flower site density and trichome development. The result is truly next level produce that stands apart from the pack in terms of quantity and quality.

iLi SERIES LED

This versatile, foldable LED is the best of both worlds. In the latest design, we've eliminated the mast to make it ideal for mounting in a rack or in low clearance settings. Using the latest technology, we've effectively INCREASED the efficacy while DECREASING the wattage in order to give your plants what they need most - all in a sleek, easy-to-install fixture.

iLi3

The ILUMINAR iLi3 is available in 240W with efficacy of 2.6 $\mu\text{mol}/\text{J}$. The ILUMINAR iLi3 is an ideal fixture for multiple indoor settings including vertical multi-rack facilities, large canopy rolling bench layouts, or even smaller hobby grower with needs for indoor agricultural tents or limited plant counts.

The ILUMINAR iLi3 comes with the option of 10-15% more micromole per-Joule output than the competition allowing the grower to have higher quality yields without sacrificing wattage to achieve their goals.

iLx SERIES LED

The low profile iLx series is the ultimate multi-use LED available. The design allows for remote mounting of the mast for a flush, secure mounting - perfect for the extremely low clearance areas occasionally needed for vegetative or cloning cycles. Growers love how easy it is to swap out individual light bars without taking the whole fixture out of service thanks to the "hot swap" easy release clips.

iLogic™ 121

IL-iLogic-121

The World's Most Advanced HPS Replacement LED

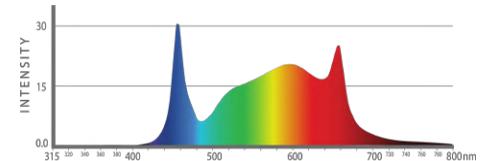

Designed for straightforward and easy installation within existing HPS lighting plans, the iLogic™ 121 represents so much more than a simple 1:1 HPS replacement for greenhouse and indoor growers. It perfectly matches the footprint and hanging height of the legacy 1000W HPS, the iLogic™ 121 offers a range of exciting new benefits for cultivators including a 22% reduction in energy consumption, higher efficiency (up to 2.7 $\mu\text{mol}/\text{J}$), best-in-class performance (2100 $\mu\text{mol}/\text{s}$), 0-10V dimming, and a much longer lifespan (L90: 50,000 hours).

FEATURES

- Full-spectrum light output
- ETL / CE Listed
- Efficiency: 2.7 $\mu\text{mol}/\text{J}$
- PPF: 2100 $\mu\text{mol}/\text{s}$
- 0-10V Dimming
- 22% Reduced Energy Consumption
- High output for high intensity
- Life Time: 50,000 hours

LED CLONE 18W

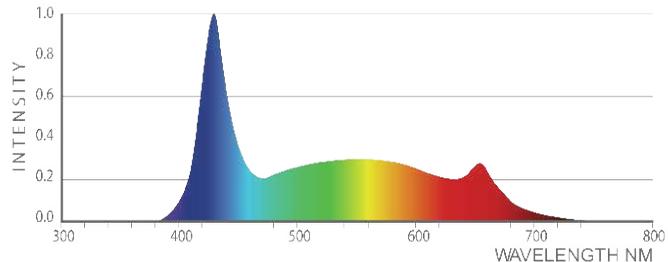

Energy-Efficient Cloning at Any Scale

Drive consistent canopies, crop quality, and productivity with a continuous supply of healthy, homogenous, and vigorous clones. The new LED Clone 18W twin-pack contains two energy-efficient LED bars, each one ideal for illuminating two full-sized propagators or equivalent cloning machines.

FEATURES

- 2 LED Clone Bars per pack
- Color Temperature: 9,000K
- Efficacy 1.9 $\mu\text{mol}/\text{J}$
- IP66 Wet-Rated
- Input Power: 18W (18W per bar)
- Each LED Clone Bar can illuminate two full-sized propagators
- Perfect for multi-level cloning. Minimum recommended hanging distance: 6" (15 cm)

iLW

THE LED FOR CLONES

THE LED PREFERRED BY BREEDERS

When growing clones, there is a balance of light to be achieved. Plants are sensitive in the early stages and as the plant grows, proper lighting strength and a lighting schedule is crucial for your plants to flourish. For this, we designed the iLW - a sleek, low-profile fixture, specifically crafted for growing clones and hardening them off for vegetation.

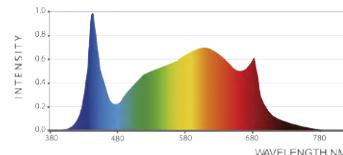

Measuring in at only 1.5" tall, the iLW LED is perfect for mounting in low clearance, tiered and baker's rack environments.

Minimum Mounting height: 6-12" to top of Canopy

FEATURES

- Multiple Spectrum LED Diodes
- Indoor Full Sun Spectrum
- Input Voltage 100V-277V
- Uniformity > 90%
- Ability to Daisy-chain fixtures
- Low Heat Coefficient
- Wet Rated IP65
- LED Lifespan 50,000 hours

Cable Logic™

Professional Grade Grow Lighting Cables

The NEW ILLUMINAR LED cabling solution allows growers to connect multiple fixtures using one single power cable. This forms an IP67 waterproof fixture-to-fixture connection to the power source.

Eliminate the need for the typical mess of LED lighting cables, which have various fixtures with multiple cables running to several power sockets.

DE HPS/MH FIXTURE

1000W • 750W/600W

1000W • 240V-277V

ILUMINAR Lighting presents the new standard for Commercial DE applications. The double-ended fixtures that contractors, facility developers, and master growers demand as a standard for their operations now have even more options, giving the operational flexibility to fit the fixture to the electrical requirements.

ROLL LOCK TECHNOLOGY

At ILUMINAR we've developed a revolutionary, single-handed "roll lock" socket for our DE fixtures. This means a simple, one-handed lamp installation. No more dropped bulbs.

Model	Input Voltage(v)	With Included HPS DE Lamp	No Lamp Included	Output Power

DE Full Light 1000W with included HPS DE Lamp	240V/277V	ILUM-DE-1K240277		1045W

HIGH QUALITY REFLECTOR

Choose from deep or wide reflectors with the highest quality German aluminum material and 96% reflectivity. Wide reflectors allow for low mounting while deep reflectors are for high ceiling mounts and warehouse environments.

HORTILUX OR ILUMINAR LAMP

The DE HPS / MH ballast is part of the Commercial Series, with the most sophisticated technology in the market. It powers the lamp inclusion of your choice: Hortilux or ILUMINAR. Both have the highest available PAR output and increased spectrum to deliver ultimate light output, with superior uniformity and a deep canopy penetration.

Bulb	Dimming Settings	Power Factor	THD	CF	Rated Input Frequency (Hz)

CMH SE 315W

The ILUMINAR 315W Single Ended CMH horticultural light is the ideal installation for all of your cultivating applications and can be used as a stand-alone fixture or as supplemental lighting.

ILUMINAR 315W CMH delivers immediate results for a swift return on investment. The case is designed to dissipate heat quickly making it run supremely cool. The fixture delivers a remarkable PAR spectrum most closely equivalent to the deeply penetrative energy of the sun.

- 30,000 Hours of Full Spectrum
- Uniform Light Distribution

CMH DE LAMP FIXTURE 1000W • 630W

Delivering a low frequency, square wave technology, the 630W and 1000W CMH Ballasts provide a constant maximum voltage to the lamp for an extended period of time giving your plants more photons of light. Ceramic Metal Halide lamps provide a wide spectrum and more UV light for your plants.

When a larger yield is the desired outcome, the ILUMINAR CMH gives you the competitive edge. Our CMH DE fixtures reduce the cost of re-lamping while also minimizing overhead expenses. The CMH ballasts are designed to properly ignite and operate on a low frequency ensuring the safety of you and your crop. ***WARNING:** Only use a low frequency ballast when running CMH lamps.

DE MH LAMP 1000W • 750W

The DE Metal Halide delivers the latest in grow lamp technology to indoor lighting. Our double-ended lamps have less than 5% degradation and increased PAR light production without consuming more energy. The increased PAR creates larger plant mass, better seedling growth, taller plants, thicker stems, more dense flowering, additional terpene and essential oil production all enhanced by specific light colors.

DE HPS LAMP

1000W • 750W • 600W

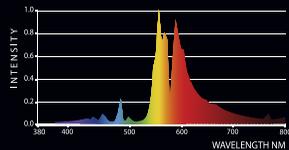

The ILUMINAR 600W, 750W, and 1000W Double-Ended HPS grow lights are the top of their class with an amazing output of up to 2100 $\mu\text{mol/s}$ and an enhanced PAR maintenance over its 10,000-hour lifetime (>95%).

HPS lamps penetrate deep into the canopy for more essential oils, resins and terpenes along with increased growth rates and yields. Regardless of which fixture you choose for the HPS lamp, the results are remarkable. When paired with the ILUMINAR brand lamps, this grow light will beat the competition at a fraction of the price.

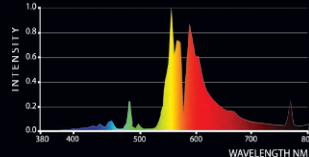

Our clients choose ILUMINAR Lighting over other indoor lighting competitors for our impressive ROI, customer service and expertise. We have lighting designers who give tailored advice for your environment and desired yields and we have the lowest failure rate in the industry.

SE CMH LAMP 315W

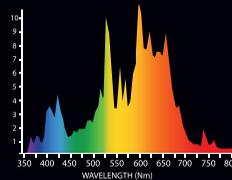

The ILUMINAR CMH Single-Ended Lamp is a natural white light with a proprietary phosphor coating on the outside of the arc tube to provide a rich spectrum and superior color quality. It's designed for maximum efficiency. Many growers prefer CMH lighting because of the power per watt it can deliver as well as the remarkable PAR spectrum that most closely matches the deeply penetrative power of the sun.

Save money on your garden with the SE 315W by not only using less power, but also running cooler than the HPS and MH alternatives. Choose the spectral output designed for each growing phase.

DE CMH LAMP 630W

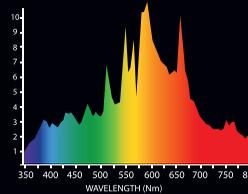

ILUMINAR 630W Double Ended (DE) Ceramic Metal Halide (CMH) lamp provides full spectrum light that benefits both the growth and flowering stages.

The CMH lamp converts the same power to more useful light. It can replace a 1000W HPS/MH lamp. CMH Lamps have a high light/power conversion ratio, and as a result, the lamp emits less heat than HPS/MH.

DE CMH LAMP

1000W

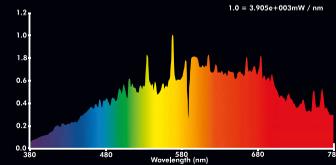

The 1000W CMH Double-Ended Lamp is a natural white light with a proprietary phosphor coating on the outside of the arc tube to provide a rich spectrum and superior color quality. Choose the 3K spectrum, for vegetation and flowering, or choose the 4K spectrum with added reds that promote tighter inter-nodal spacing leading to more flowering sites and a fuller plant canopy.

3K

The 1000W 3K provides the richest spectrum. Optimal for flowering but can be used during the vegetative state as well.

4K

The 1000W 4K lamp promotes tight inter-nodal spacing, leading to more flowering sites and a fuller canopy.

Model	Color Temperature	Photon Flux	Lumens	Lumens Per Watt	Rate Life	CRI	SKU

Professional Grade Lighting System

Maximum Uniformity

Due to the high quality German materials and design of the ILUMINAR Deep reflector you are guaranteed the highest levels and uniformity for your garden. Swap with the ILUMINAR Wide reflector for lower clearance grow rooms.

Replaceable Reflector

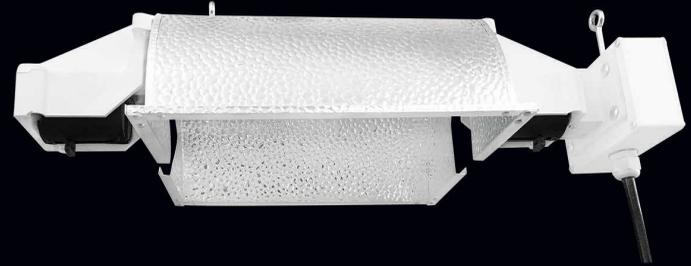

All our reflectors are easy to replace, guaranteeing optimal performance of your equipment and prolonging the life of our investment. Due to grow room conditions, we recommend replacing your reflector every year. Do not attempt to clean the reflector, as the process of cleaning will damage the reflectivity of the reflector.

Rugged Design

Made of a coated, die-cast aluminum the reflector bracket is stable and durable, made for a life-long of trouble-free use.

Roll Lock Technology

Includes the ILUMINAR proprietary single-handed "roll lock" socket for our fixtures - that means simple, one-handed lamp installation. No more dropped bulbs!

VERTICAL DE LAMP FIXTURE

At ILLUMINAR, we dedicated ourselves to bringing back the Vertical Double-Ended fixture. With indoor vertical grow farms opening, vertical is back at the forefront of growers' thoughts and re-engineering traditional ideas is the new frontier.

Taller plants with more branched canopies have very different lighting needs compared to shorter, broader canopy plants. If light doesn't break the initial canopy layers at the top, you stand to lose yields in your branched canopies below. This is where vertical 'inter-canopy' lighting steps in.

FEATURES

- Diameter: 104mm
- Length: 564mm
- Cord: 15 ft
- Plug type: SS
- Cold rolled, hot galvanized dipped steel frame
- Single hand 'roll-lock' socket for simple installation
- 360° Borosilicate glass safety jacket

TOUCH+ CONTROLLER

The ILUMINAR Touch+ Controller controls two zones or two separate rooms of lights within a 24-hour cycle. The controller turns groups of lights on and off, simulates sunrise and sunset and takes care of several other functions like overheat protection all from an easy-to-use touchscreen control.

The ILUMINAR Touch+ Controller will now allow you to control up to 60 lights per zone or room on two channels. Control up to a total of 120 lights.

FEATURES

- Control LED + CMH + HPS/MH
- Touch Screen Technology
- Sunrise / Sunset Effects
- 2 Independent Rooms, Controls up to 60 lights
- Dual Temperature Zone Input for High Heat Dimming
- Automatic Temperature Shutdown to Safeguard Your Grow
- Dual Temperature Probe Inputs

The ILUMINAR Touch+ Controller takes lighting to a level of simplicity that will allow any gardener to perfect their lighting schedule with just a few touches.

A WORLD OF INFORMATION AT YOUR FINGERTIPS

ILUMINAR Lighting has created the first controller on the market to run LED, CMH, HPS, MH, as well as T5 fixtures all on the same channel. The HASH Controller allows you to record and view in real time the VPD, temperature, CO₂, PAR, humidity and more throughout the growth cycle. Retrieve that information at the touch of a button from your smartphone or device.

Compatible with	LED, HPS, CMH, MH and T5

WARRANTY

The ILUMINAR Lighting product line offers the most versatile, full-spectrum fixtures on the market with outstanding 24/7 customer service you can count on. From remote assistance to on-site personnel with tailor-made solutions for your facility, we stand behind our customers and our products.

The standard limited warranty for our products is:

- 5 Years** on LEDs
- 3 Years** on HID Fixtures and Ballasts
- 1 Year** on Lamps & Controllers
