7.0 PROCESSING RECOMMENDATIONS

7.1 Mating Alignment Requirements:

- 7.1.1** The parts can be rigidly misaligned by no more than 0,07 mm (.003") in the X- and 0,14 mm (.006") in the Y-direction to ensure a good mate.

Series: **MEC6** 0,635mm (.025") Mini Edge Card Connector, Vertical

7.2 Mating Angle Requirements:

7.2.1

7.2.2

7.3 Multiple Connector Applications: Not recommended for applications in which multiple connectors are mated to a single daughtercard. For more information, please contact IPG@Samtec.com.

7.4 Maximum Reflow Passes: The parts can withstand three reflow passes at a maximum component temperature of 260°C.

7.5 Stencil Thickness: The stencil thickness is .006" (0,15 mm).

7.6 Placement: Machine placement of the parts is strongly recommended.

Note: If the Locking Clip option (-LC) is used, manual placement will be required if the force needed to fully seat the connector exceeds the limit of the machine placement equipment. For more information, please visit the Processing page on our website or contact Samtec's Interconnect Processing Group at IPG@samtec.com.

Series: MEC6 0,635mm (.025") Mini Edge Card Connector, Vertical

7.7 Reflow Environment: Samtec recommends the use of a low level oxygen environment (typically achieved through Nitrogen gas infusion) in the reflow process to improve solderability.

7.8 Cleaning: Samtec, Inc. has verified that our connectors may be cleaned in accordance with the solvents and conditions designated in the EIA-364-11 standard.

7.9 Due to variances in equipment, solder pastes and applications (board design, component density, etc.), Samtec does not specify a recommended reflow profile for our connectors. The processing parameters provided by the solder paste manufacturer should be employed and can usually be found on their website.

All of Samtec's surface mount components are lead free reflow compatible and compliant with the profile parameters detailed in IPC/JEDEC J-STD-020 which requires that components be capable of withstanding a peak temperature of 260°C as well as 30 seconds above 255°C.
