

Product Lifecycle Notice: End of Life

LRS455A Series

FreeWave will be discontinuing the LRS455A series of radios due to a number of factors including a lack of availability of key components. These products will remain available until May 31st, 2023.

FreeWave's mission is to deliver the highest level of customer service at each stage of a product's lifecycle, including its end-of-life. At this time, our goal is to replace the LRS455A series of radios with the next generation → LRS455B.

To allow customers time to plan for the future of their networks, FreeWave intends to keep the above radio models available for 12 months following this notice, in accordance with FreeWave's Lifecycle Policy. In the event of extreme unexpected demand, FreeWave may limit the number of radios available per customer to ensure general product availability for the full 12 months. After May 31st 2023, new LRS455A series radios will no longer be available. Product warranties will be honored in full, and FreeWave reserves the right to repair or replace units under warranty at our discretion.

FreeWave remains committed to its customers as it has for nearly 30 years. If you have any questions regarding the LRS455A series of radios, or FreeWave's Lifecycle Policy, please reach out to your FreeWave Regional Sales Manager or email us at support@freewave.com.

**FreeWave is announcing
end of life for the
following models,
including all
