

Universal WorkBench™

1010 Base and Cover

Spend less time figuring out how to mount components and more time connecting and programming.

"Fantastic product! This will be very helpful in keeping my projects organized and easy to access"

— STEVE S., MAKER AND TECH PRO

Less Frustration. More Innovation.

You bring the electronics. The Universal WorkBench is everything else needed to make your project look amazing and professional. It empowers you to transition ideas easily from prototyping all the way to field-hardened, hazardous environment deployments using the same standard interface.

1010 BASE

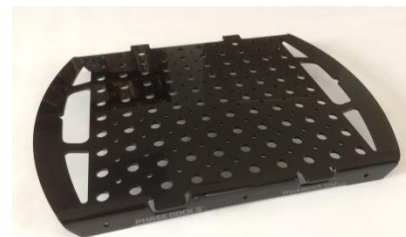

Use to prototype, manage electronics, and transport your projects.

- Hang by handle for easy temporary storage
- Holes on legs enable more permanent mount, if desired

1010 COVER

Protects and makes projects easily and safely portable.

- Ample space for wire or cord through-access
- Ventilation to prevent electronics over-heating
- Holes on sides align with Base; bolt Cover to Base for extra security

Universal WorkBench 1010 Product Specifications
