From: Smart Buildings Solutions Product Management Team

Subject: Smart Buildings Solutions Product Discontinuations

Belden's Smart Buildings Solutions business continues to modify the product portfolio to simplify our offering and enhance our service to you. Some of these changes result in discontinuation of certain products which will take effect on April 29, 2024. Select legacy broadcast products or variations of those products, such as certain colors or put-ups, make up most of the discontinuations.

Product portfolios impacted are:

- Select Gepco- and Belden- branded legacy broadcast cables
- Select legacy coax cables
- FLEX USOC RJ45 jacks in various colors – will continue to be available in white
- Workstation Connectivity Products – select legacy items and non-popular colors

A comprehensive list of discontinued items and recommended alternatives can be found [here](#).

Backorders that have been scheduled will be honored. New orders will not be accepted after April 29, 2024. A limited amount of discontinued inventory may be available after that time to support your transition to a replacement based on availability. These orders will be non-cancellable and non-returnable. If interested, please contact Customer Service directly for a stock check as inventory may not be visible on eDesk. To help your transition from the discontinued products listed herein, recommended substitutes are listed as available.

In addition, MOQ for most special coax items will be increased to 10,000 ft.

We thank you for your partnership and continued loyalty to Belden as we carry on our commitment to provide the highest level of quality and service. Stay up to date on product information by visiting www.Belden.com. If you have any further questions on these updates, please contact your inside sales representative or call 1-800-BELDEN1.
