1 General Description

1.1 Overview

This is a 12" a-Si TFT active matrix Electronic Paper Display (EPD) module. The module has such high resolution (103 dpi) that it is able to easily display fine patterns. Due to its bi-stable nature, the EPD module requires very little power to update and needs no power to maintain an image.

1.2 Features

- a-Si TFT active matrix Electronic Paper Display (EPD)
- Resolution: 960 x 768
- Ultra low power consumption
- Super Wide Viewing Angle near 180°
- SPI interface
- RoHS compliant

1.3 Applications

- e-POP/Signage
- Electronic bulletins
- Office Automation
- Navigator

2 Absolute Maximum Ratings

2.1 Absolute Ratings of Environment

Table 2-1 Absolute Ratings of Environment

| Itam | Cumbal | Value | | l loit | Noto | |
|-------------------------------|------------------|-------|------|--------|---------|--|
| Item | Symbol | Min. | Max. | Unit | Note | |
| Storage Temperature | T _{ST} | -25 | +70 | °C | (1),(2) | |
| Storage Humidity | H _{ST} | 30 | 90 | %RH | (1),(2) | |
| Operating Ambient Temperature | T _{OP} | -15 | 60 | °C | (1),(3) | |
| Operating Ambient Humidity | H _{OP} | 30 | 90 | %RH | (1),(3) | |
| Optimal Storage Temperature | T _{OST} | -10 | 35 | °C | (1),(2) | |
| Optimal Storage Humidity | H _{OST} | 40 | 60 | %RH | (1),(2) | |

Note (1):

- (a) 90 %RH Max. (Ta \leq 40 °C), where Ta is ambient temperature.
- (b) No condensation and no frost in absolute ratings of Environment.
- Note (2): E Ink Material is Moisture and UV sensitive. The absolute rating operating environments describes the boundary conditions for updating the display while the absolute rating storage environment describe the boundary conditions for a display not updating. While displays are rated to perform according to specification for the warranty period at the absolute specified operating environment, the better the storage condition, the better the E Ink displays will perform. Similar to other moisture and UV sensitive components, we recommend that our displays be stored in temperature and humidity control environments, and whenever possible, under above defined Optimal Storage Condition, away from sunlight, to optimize their performance.
- Note (3): The performance of EPD may be degraded under sunlight. Please customer consults PDI if customer wants to use EPD under sunlight.
- Note (4): Fast update mode is supported at 0~50°C. (Please execute normal update mode when the image gets worse.)

| Low Temperature Storage | -25°C for 240h | (1)(2)(3) |
| High Temperature/Humidity Storage | 60°C / 80 %RH for 240h | (1)(2)(3) |
| Thermal Cycles (non-operation) | 1 Cycle: -20° C /30min \rightarrow 70 $^{\circ}$ C /30min, for 100 Cycles | (1)(2)(3) |
| Package Drop Test | Drop from 97cm. (ISTA) 1 corner, 3 edges, 6 sides. One drop for each. | (1)(2)(3) |
| Package Random Vibration Test | 1.15Grms, 1Hz ~ 200Hz. (ISTA) | (1)(2)(3) |

- Note (1): No condensation and no frost during test. End of test, function, mechanical, and optical shall be satisfied with product specification and IIS.
- Note (2): The test result and judgment are based on PDI's 1bit driving waveform, driving fixture, and driving system.
- Note (3): Stay white pattern for storage and non-operation test.

2.3 Product Warranty

Warranty conditions have to be negotiated between PDI and individual customers. PDI provides 13 months warranty for all products which are purchased from PDI.

- Note (3): Refresh time is the time that e-paper particles move not including the power on and off time. The refresh time is measured at 25°C. The refresh time and contrast ratio varies due to different films, display performance requirements, and ambient temperatures.
- Note (4): Contrast ratio (C.R.): The Contrast ratio is calculated by the following expression. C.R. = (R% White) / (R% Black).
- Note (5): Optical data is measured at 60 seconds after refresh with PDI's global update procedure.

6.3 Ghosting

Below are two test methods to verify if ghosting is within an acceptable range. Test 1 and Test 2 use measured data to calculate color different, $\triangle E_{00}$ (CIEDE 2000).

The condition of measurement is to follow "Table 6-1 Optical Measurement Conditions".
